

11/5/19

Project Scope

Why - I was planning on doing an apprenticeship starting in January. I was really excited because it was for a year long and if I found a job during that year, they would let me go, or there was a chance I could stay and work with them. The problem is that the companies that they work with had some issues and so there wasn't going to be a whole ton of projects for us to work on. The decision that they made was that they were going to push the apprenticeship for Spring 2020. That pretty much ruined my plans for when I go home after this semester. So now I need to figure out what I will do when I go home in January and have backup plans in case this apprenticeship fails again. I would have applied for multiple internships by December 20, 2019 and I will have a job ready to go by January 1, 2020.

What - Figure out what to do for when I go home and find back up summer internships.

Project Deliverable

- I will have a job/volunteer opportunity when I get home
- I will have at least three interviews for a summer internship that interests me

How -

Define Activities -

- Search for other internships
- Search for jobs to work during my break (or full time volunteer opportunities for web developers)

Information Gathered:

1. Pandora

- Found: Handshakes
- Title: Summer Intern, Front End Engineering
- Location: Atlanta, Georgia
- Paid: Yes
- Full/Part: Full Time
- Dates: 6/1/20 - 8/7/20
- Deadline: November 29, 2019 @ 9:55pm

2. IBM

- Found: Handshakes
- Title: 2020 Summer Intern - Front End Developer
- Location: Atlanta, Georgia & other
- Paid: Yes
- Full/Part: Full Time
- Dates: Summer 3 months
- Deadline: December 2, 2019 @ 9:55pm
