

Please open your **Table of Contents** page from your **Statistics Notebook** (index.html) for easy reference during this quiz.

Have you done this?

☒ Yes

☐ No

Are you able to locate the "t Tests" page (under Making Inference) of your Statistics Notebook?

(Check all the pages that you able to locate within your Notebook.)

☒ The "Making Inference" page under "Making Inference"

☒ The "t Tests" page under "Making Inference"

☒ The various "Example" files under "One Sample t Test", "Paired Sample t Tests", and "Independent Samples t Test".

You will need these files to complete this quiz.

Please now spend at least 5 minutes studying the contents of your **Statistics Notebook t Tests page**. It is recommended that you study for longer than that, but at minimum you are requested to study these pages for at least 5 minutes prior to completing the remainder of this quiz.

☒ I have done this.

☐ I elect to not do this.

Customize your **Statistics Notebook** by adding some new information to the **Table of Contents** page (index.Rmd). What you add is totally up to you, but you are requested to add some new notes to get credit on the following question. (On your honor obviously.)

☒ I have successfully added some extra notes (beyond what was there previously) to my Table of Contents page. These notes are now part of my Statistics Notebook when I open it up.

☐ I am lost. I have emailed my instructor for help.

☐ I am lost and am not going to do anything about it right now.

Please continue adding notes to your Table of Contents page each week all semester long. This page will become the most useful part of your Statistics Notebook if you use it correctly. It is also a required part of the course as explained in the "Statistics Notebook" portion of your Math 325 Course Syllabus in Canvas.
